

## Levy and LEA Bill Comparisons

Bill	Levy Proposal	LEA Proposal	Timing	Other
SB 5313 (Governor request)	Sets maximum levy at 28% of state and federal appropriations.	Sets maximum LEA at 14%	CY 2020	Eliminates ghost money and grandfathering.
SB 5316	Gives districts a choice of \$1.50/\$1000 OR \$2,500 a student.	Not mentioned; couldn't figure out how to model	Effective in CY 2019	
SB 5466 (OSPI request)	Sets maximum levy at 22% of a school district's prior school year actual state and federal revenue or \$3,500 per student, whichever is less.	A <b>district is eligible</b> to receive LEA <b>if the tax rate needed</b> for the lesser of the 22 percent levy or the \$3,500 per pupil limit <b>exceeds the state local effort assistance threshold defined in the state budget.</b> (OSPI has proposed \$3.75/\$1,000) The LEA funding amount for an eligible district is the difference between the district's tax rate and the state local effort assistance threshold.	CY 2020	Increases the maximum per pupil limit to \$3,500.  Eliminates the OSPI "levy approval" requirement.  School capital and transportation levies would count under enrichment levy limitations.  LEA funding must be provided to eligible school districts even if they do not run an enrichment levy.
HB 1547 (OSPI request)	See levy provisions in SB 5466 (above)
